

DHA Biomass Powder

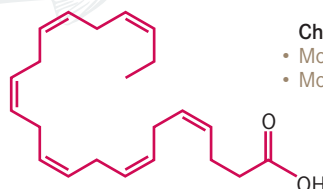

DHA rich algal biomass powder Feed Grade

DAESANG DHA powder is produced with advanced, sustainable fermentation technology.

Product Description

DHA (docosahexaenoic acid), one of the omega-3 fatty acids, is an essential fatty acid needed for growth in fish and animals. DAESANG's DHA biomass powder is derived from microalgae, *Schizochytrium* sp., and stabilized with Tocopherol and Ascorbyl palmitate. It contains a min. 18% of DHA and is wonderful fish oil substitute.

Chemical Properties

- Molecular formula: $C_{22}H_{32}O_2$
- Molecular weight: 328.5 g/mol

Commercial Guarantee

DHA content	Min. 18.0%
-------------	------------

We hereby certify that the DHA powder referenced in this document was analyzed and approved by the Department of Quality Management.

General Specifications

Appearance	Yellowish powder
Crude fat	More than 35.0%
Crude protein	More than 8.0%
Moisture	Less than 5.0%

Application & Function

- Pet food
 - Supports the development of nervous system
 - Improving eye health and trainability
- Aquaculture : Non-fish-based DHA source
- Animal feed : Promotes livestock growth

Quality Assurance

- End-to-end quality control management throughout the fermentation process
- HALAL, KOSHER for food grade
- ISO 9001, FSSC 22000

Storage & Stability

Store: In a sealed original packaging in a cool, dry and dark area at room temperature
Shelf-life: 12 months from the date of manufacture (DOM)

Packaging & Delivery

15kg: net in a PE bag in a reinforced paper bag
